

AFFRONTIAMO LA SORDITA' INSIEME

ASSOCIAZIONE PER PROBLEMI DI SORDITA'

ASI is a Forum of 4.600 members across the National territory. The forum offers support and resources to its members and serves as a network connecting families with other families as well as medical professionals involved in the hearing loss journey across the National territory. The Forum is a window for the initiatives of other Italian Associations so that the greatest number of resources may be made available on a local, regional and national level for families and adults with hearing loss regardless of communication methodologies used.

We collaborate with Assoc on a global level. Projects include sensitivity training for pediatricians and neonatologists to promote newborn hearing screening that is not a national program, but regionally based. We organize informative meetings and promote parent to parent support through these meetings.

ASI Forum is not an association as I have never wanted to request money from the families. I have formed a committee consisting of other regional Associations who provide bureaucratic assistance for national congresses requiring contributions from sponsors.
